

REGULATING DIGITAL PLATFORMS

Competition and regulation

An advanced-level, four-week online course designed to equip participants with cutting-edge knowledge on digital platform business models, dynamics, and regulation in their interaction with privacy, competition, and AI law.

This program is tailored for officials from national authorities and regulatory bodies (NRAs, NCAs, data protection authorities), law and technology academics, economic consultants, in-house experts and lawyers, decision makers, and stakeholders active in the field.

04 March - 8 April 2026

Sabine Zigelski
Bundeskartellamt

Alexandre De Streel
Namur University

Connor Hogg
OECD

LEARNING OUTCOMES

1

Appraise fully the complexities and main technical features of digital platforms, comparing their different business models

2

Identify and analyse major competition concerns linked to the multi-sided structure of digital platforms, including risks of tipping, network effects, and user lock-in

3

Assess how digital platform regulatory instruments interact with consumer protection, competition law, and data-privacy regimes, highlighting synergies and tensions in the enforcement sphere

4

Demonstrate up-to-date knowledge of latest enforcement cases and touching base with the evolving digital platforms policy landscape

5

Acquired skill to confidently engage in multidisciplinary, policy-oriented discussions with stakeholders, practitioners, policymakers and experts in economics, law, and digital regulation

PROFESSIONAL DEVELOPMENT

Certificates of attendance, distinction, and excellence will be awarded.
