

REGULATING DIGITAL PLATFORMS

Regulating Digital Platforms

6 week online course
5 June - 10 July 2024

Our online course will guide you into the fundamental economic features of the platform economy, encompassing platform business models and market dynamics. Our lecturers will provide you with analyses of the interaction of competition policy with ex-ante regulation in relation to different digital platforms. In addition, the course draws comparisons between regulatory outcomes in different global regions. Starting from a strong EU focus, it will cover recent cases of competing tech giants from the USA, China, and other parts of the world, as well as the EU Digital Markets Act. As the non-compliance phase for the DMA has started, mastering this subject is urgent for professionals. With a multi-disciplinary legal and economic approach, this course will equip you with the most recent expert insights, analytical tools, a wider professional network, and an official EUI certificate.

Each module will consist of dedicated learning materials, self-evaluation assessments, a forum of discussions, videos, and a weekly, interactive live class followed by a group debate.
